GX10/GX20  
Paperless Recorder  
(Panel mount type)

**SMARTDAC+**

GS 04L51B01-01EN

## OVERVIEW

The GX10/GX20 are paperless recorders that display real-time measured data on a touch screen and save data on an external storage medium (SD card).

For the input/output module specification, please see GX90XA/GX90XD/GX90YD/GX90WD Input/Output Module General Specification (GS 04L53B01-01EN).

- The number of analog input is a maximum of 100 channels in GX10 with expandable I/O, and a maximum of 450\* channels in GX20 with expandable I/O.  
\* Max. number of input/output channels is 500 channels.
- The GX10/GX20 have the large internal memory (GX10/GX20 standard type: 500MB, GX20 large memory type: 1.2 GB), and prolonged record and preservation are possible.
- As the input signal, a DC voltage, thermocouple, resistance temperature detector, DI (DCV input (TTL), contact signal), or mA (DC current) can be set to each channel.
- Input and output have module structure and it can extend them easily. (GX10: max. 3\*, GX20: max. 10\*)  
\* In case of using expandable I/O, GX10 can extend two units, GX20 can extend 9 units.
- A module type is four types, an analog input, a digital input, a digital output, and a digital input/output.
- A maximum of six units of expandable I/O can be connected to GX10/GX20. Each expandable I/O can incorporate a maximum of six modules. With expandable I/O connected, GX10 and the large memory type GX20 can use multiple channels. Furthermore, the I/O ports can be installed in separate locations from where GX10/GX20 is located, helping you reduce wiring requirements and build a decentralized configuration.
- The intuitive operation by flick, pinch in, pinch out, and swipe are possible.
- The past trend under recording can be seamlessly displayed on a trend screen.
- Moreover, the measurement data of the time specified on the calendar screen can be searched and displayed.
- Various functions, such as a freehand message, a PDF/Excel output of a report file, a direct output to a network printer, a scale movement of a trend display, and a buzzer sound, are equipped.
- It can be hooked up to network via Ethernet, which enables to inform by Email and to monitor on Web site as well as to transfer files by using FTP. Also, it can communicate with Modbus/RTU or Modbus/TCP.
- A setup of GX can be performed on-line from the web browser on PC. A setup by off-line is also possible.
- Universal Viewer software allows a PC to display waveforms on its screen and to print out waveforms.

**Product Purchase Specifications**

The GX10/GX20 is composed of the main unit, I/O modules, Expandable I/O, and Expansion module.

There are two ways to purchase I/O modules.

One way is to purchase them individually by specifying models GX90XA, GX90XD, and GX90YD.

The other way is to purchase them as an option (/UCxx or /USxx). Purchasing them as an option is convenient, but this places limitations on the number of analog inputs that you can obtain.

If you want to use more than 50 channels, please purchase the I/O modules individually.

To connect expandable I/O (GX60) to GX10 or GX20, you must purchase one unit of expansion module (GX90EX) for GX10/GX20 in addition to the expandable I/O.
